

## EYELASH AND EYEBROW TINTING SYSTEM FOR THE SALON PROFESSIONAL

Created for the salon professional, Apraise<sup>®</sup> Eyelash and Eyebrow Tinting System with Optic Chroma Complex, fuses colour pigment technology and Beeswax with a rich cream base to penetrate deep into the hair shaft to provide radiant colour from root to tip. This blend of active ingredients ensures long lasting and intense colour, luminous shine and condition for a result that visibly transforms the appearance of the eyelash and eyebrow.

Apraise<sup>®</sup> is a water resistant, smudge proof formula which lasts up to 8 weeks.

### Apraise Eyelash and Eyebrow Tint 20ml

**Directions for use:** To apply: Immediately before application, mix 2cm of tint and 10 drops of Apraise<sup>®</sup> Eyelash Developer 3% (10 Vol) until a creamy paste is achieved. Apply petroleum jelly around the eyebrows and on the upper eyelids with a cotton bud. Place a protecting paper, the reverse coated with petroleum jelly, under each lower eyelash of the client. Ask the client to close their eyes. Using a brush, first apply the prepared dye to the lashes, then apply the same or a lighter shade to the brows. Avoid contact with the skin. The development period is between 5 and 10 minutes. To remove: First wipe the eyebrow with a piece of dry cotton wool, then wash and cleanse the skin with warm water. Now remove the protecting papers and rinse the rest of the colour-cream from the eyelashes with warm water while the client's eyes are still closed. Mixing Ratio 1 : 1

### Tint Developer 50ml

Mix with Apraise<sup>®</sup> tints to bring out colour and create long lasting results.

**Direction for use:** Use only with Apraise<sup>®</sup> Eyelash and Eyebrow Tint. Refer to Eyelash Tint pack for mixing instructions. Refer to Eyelash Tint pack / leaflet for precautions / warnings. Caution: For professional use only. Avoid contact with eyes. Rinse eyes immediately if product comes into contact with them. Contains hydrogen peroxide (3%).

### Stain Remover 100ml

Effectively removes any stains or splashes that may occur when performing a tinting procedure.

**Directions for use:** Using a cotton pad, apply to affected area and wipe clean. Caution: Keep out of eyes. External use only.

## Petroleum Jelly 50ml

A salon essential to prevent skin staining while tinting.

**Directions for use:** Apply the jelly round the eye area when applying tinting dye, to stop the dye running onto skin. Caution: Keep out of eyes. External use only.

## Dappen Dish

Glass dish perfect for mixing when performing eyelash and eyebrow tinting.

## Tint Brush

Applicator brush designed to create accuracy when applying Apraise<sup>®</sup> lash and brow tint.

## Tint Papers

Protective Sheets to protect the skin and eye area during lash and brow tinting.
